Teacher you are great!

On this wonderful occasion, we honour and respect all our teachers for their selfless services to the society especially of educating the young mind of the society. Teachers are the foundation pillars of a successful society. They impart education, knowledge and spreads ideas and ideology for the better progress and prosperity of the nation.

Teaching is a noble profession and vocation to train the young mind in a right direction to achieve their goal. Teachers are respected persons in our society for their wisdom, knowledge, understanding, commitment, self-sacrifice and so on.

HAPPY TEACHER'S DAY

Dil Se Dil Tak

Ever since the closure of schools following the lockdown, we have been feeling strange awkwardness being teachers. The whole hue and cry over the school fees, whether to be paid or not has led to uncomfortable feeling in the heart and head of a teacher.

Suddenly a teacher's work and worth is being made to look directly proportionate to the school fees being paid and this sadden us.

This lockdown made us realize that teachers are still many - many miles and mindsets away from over getting their due. The closure of schools were immediately looked upon as though teachers had suddenly decided to sit back home and have a nice 'gala time'. However, the online classes initiative by all the schools were undertaken almost on a war footing and the teachers were back in action, though on unfamiliar situation. The stake holders not for the single moment sympathized with the predicament of the teachers. We were pushed into situation which were never prepared for. But a teacher, being a teacher rose to the occasion and today we can proudly say that most of the teachers are handling the online classes with considerable ease and creativity.

Parents who sit in the virtual classes with their children have great responsibilities. The Social Media is abuzz with parents criticizing for the slightest reason and this saddens us so much. It looks like as if a school fee is enough to buy the right to judge a teacher with unreasonable yardstick. The school management is of course ensuring that the parents who are paying the fees should get their value for even the last penny.

The pressure on the teacher is enormous. We, the teachers are hardly worried about the Pandemic, all we worry is about day in and day out is our next virtual lesson plan. The questions that torment us most often are....

- ❖ What if the internet doesn't work?
- ❖ How will we manage time during the online lectures?
- ❖ What if our classes are not given a thump up? And the list goes on....

The Corona Virus has lost all its potency for a teacher. They are over and above its lethal sting. So on this special day, when we celebrate Teachers' Day, we salute teachers for their sacrifice, their devotion and their love. We can say teachers are "Survivors". Teachers knows how to rise above the tide. We have super powers and we know how to use them for the right purpose. The Pandemic will end and one day but what will remain for a long time is rather the uncomfortable feeling of being a teacher in a locked down world.

The child arrives like a mystery box with a puzzle pieces inside, some of the pieces are broken or missing and others just seem to hide. But the HEART of a teacher can sort out them out and help the child to see potential for greatness he/she has within a picture of what they can be.

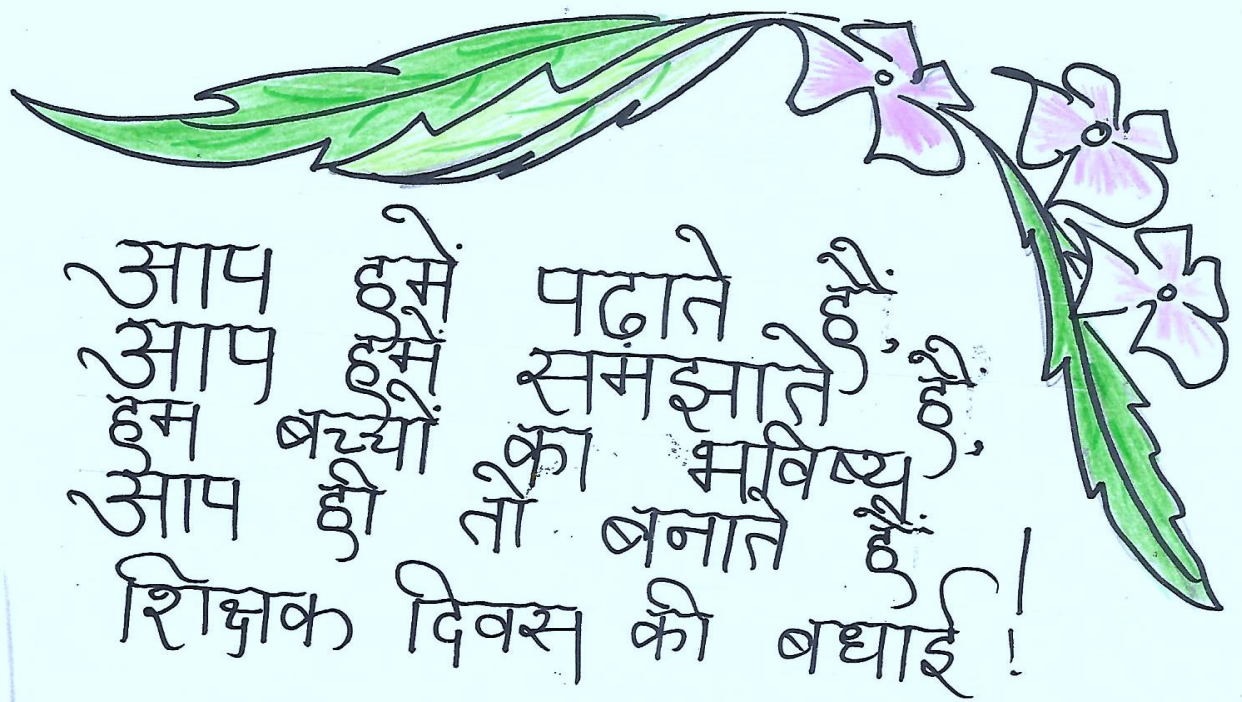

After all it is not the subjects that matters, But the right way of teaching to the child does matter.
